

Logic • Kit L-1

High quality and performance, expandable, portable rider's system, providing independent master volumes and VOX pre-set and forget controls with options to add a passenger headset or bike power at any time, providing a rider (or rider and passenger) with seamless integration and connectivity, plus logical mixing and control for all your audio/communication needs.

6 Aux inputs and a range of optional leads and/or Bluetooth wireless modules let your customise your system to suit your personal needs.

Kit L-1 • Expandable, portable rider system

Complete with:
Main logical mixing and control hub
Rider's noise cancelling stereo headset
Standard phone lead*
Standard stereo music lead
Full instructions for set-up and use

Special kit price

£175 - Rider kit

Main Features and Benefits

- Ultra high quality, plug-in, noise cancelling boom microphone**
Does an incredible job of picking up your speech while rejecting the maximum amount of undesirable ambient helmet noise.
 - Tuned active noise reduction filter with speech boost**
Works together with the noise cancelling microphone/s to ensure even less noise is amplified through the system or speakers (typically rejecting 99% noise at 70mph and 95% at 100mph), while also boosting speech for optimum high speed clarity and use, tested to 180mph.
 - Voice activation (VOX)**
Reliably turns the microphone/s 100% off while not speaking to ensure that ZERO noise is amplified through the speakers. This not only reduces riding fatigue but also means that all other audio such as bike-to-bike, GPS, phone and stereo music etc are completely free from any additional amplified noise.
 - Side-tone**
Gives you the benefit of letting you hear your own voice clearly which helps you to naturally speak at the correct level according to varying helmet noise conditions, and this avoids unnecessary shouting that non-side-tone products normally suffer. Side-tone also provides you with important audio confirmation of correct VOX set-up and use, which improves rider to passenger communications as well as hands free voice activated bike-to-bike radio use. What you hear you know they will be hearing. Without side tone you simply cannot know this.
 - Logical mixing and control with 6 Aux connections**
For bike-to-bike, stereo GPS, stereo phone, stereo music.
 - Optional plug-in, stereo Bluetooth wireless module/s**
For wireless connection of stereo phone/GPS/music.
 - Full duplex**
Allows both rider and passenger to speak naturally and freely and at the same time, either to each other or while on the phone. With full duplex there is no need to wait for a break, or "over!" Important local information can be communicated instantly and effortlessly at all times, e.g., "watch out for that truck" etc., even while using any other inputs. **Important rider-to-passenger communications are never interrupted or lost while using any other features.**
 - Independent rider and passenger master volume controls**
Lets you manage the sound levels independently to each headset, making it ideal for use with or without earplugs or any combination. Each control is colour coded for easy identification at a glance.
 - Independent high quality stereo amplifiers**
Provides high quality stereo reproduction to each stereo headset.
 - High power, super slim, stereo speakers**
Ergonomically designed for maximum comfort, high quality speakers deliver all the sound you need for use with or without earplugs.
 - High quality, robust, water resistant leads and connectors**
Designed to quick release in an emergency, with large orientation markings to ease alignment, even with gloves on.
 - 12 months warranty, with free upgrade to 24 months**
When you register your new product direct with Autocom on-line within 14 days of purchase.
- *Some phones may require a personal hands free adaptor.

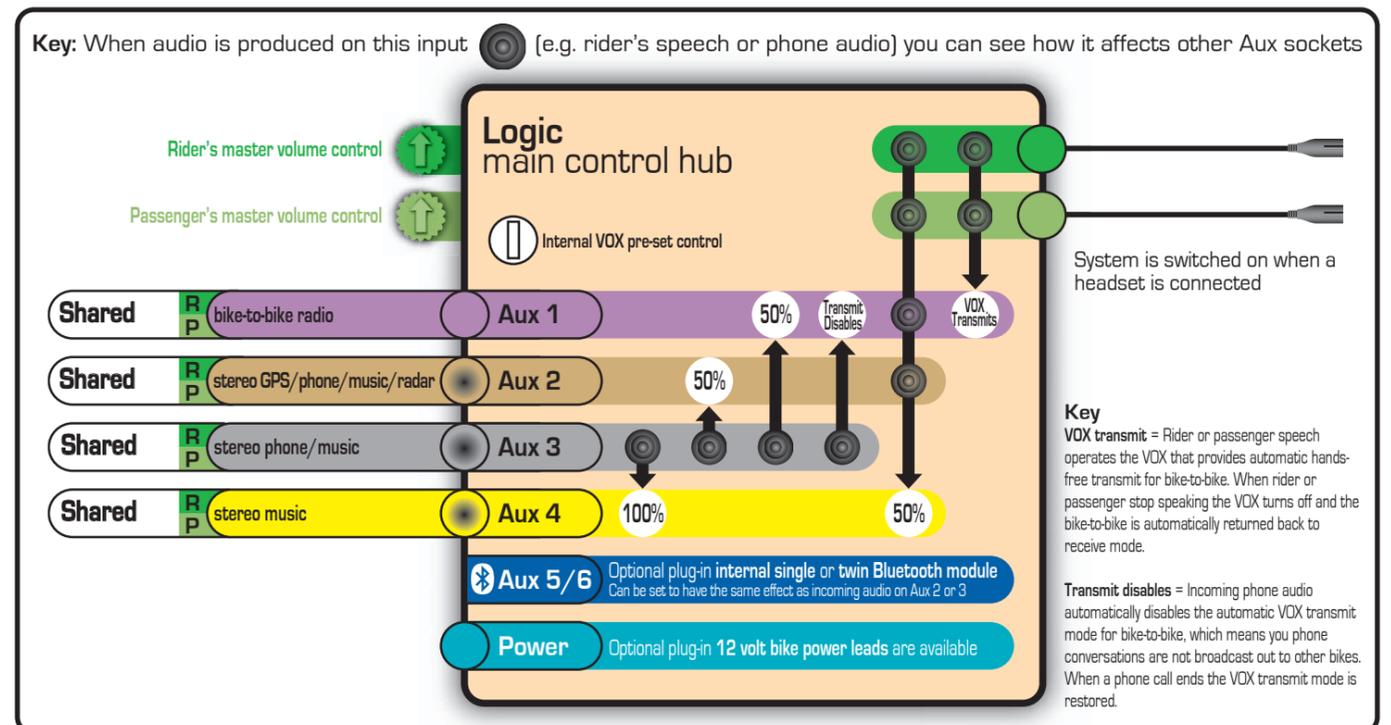

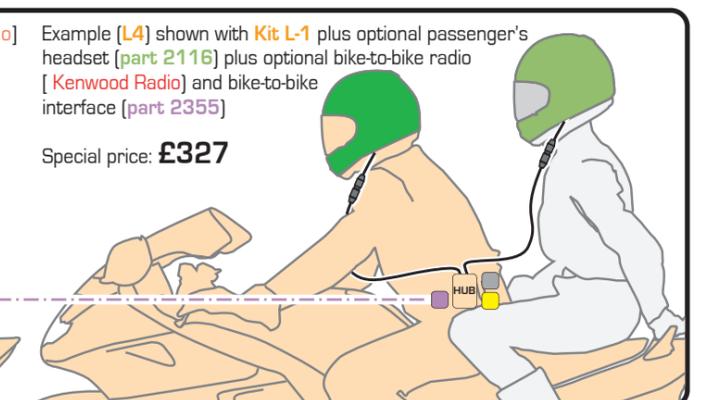

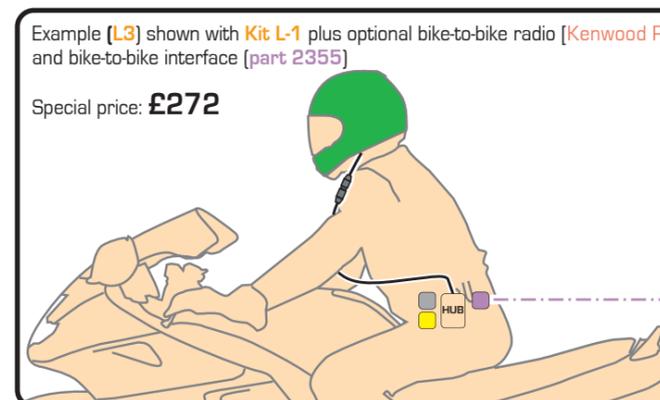

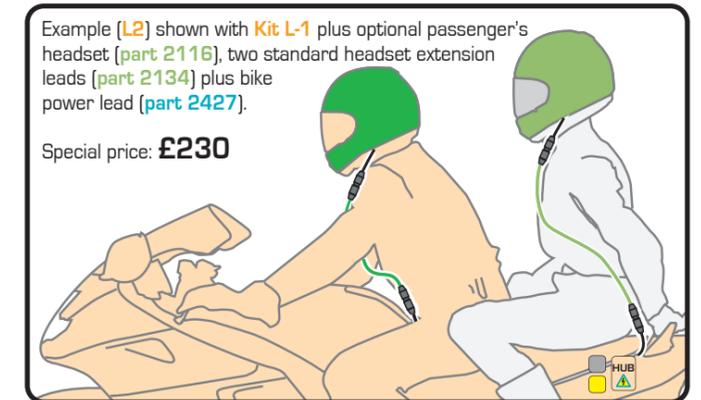

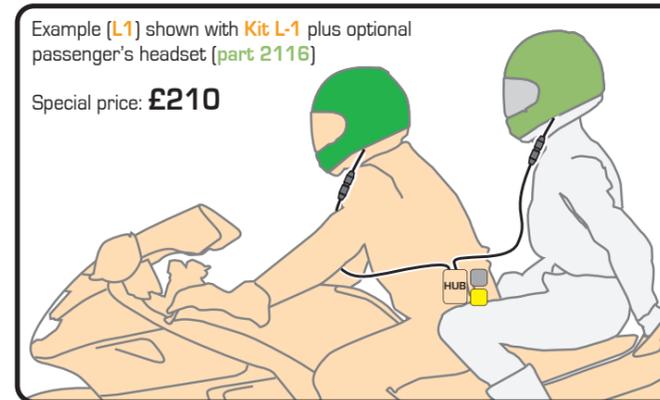

Technical Specifications:

Main hub size:
68mm x 109mm x 27mm [2.7" x 4.3" x 1.1"]

Requires 3 AA batteries (not supplied).
Typically 60mA to 250mA or maximum 1000mA if used to bike power an optional bike-to-bike radio when bike powered.

Headset speakers:
High power light weight magnet.
Impedance 8 ohm high power.

Noise cancelling efficiency:
ZERO amplified noise when not speaking and not activating the VOX, typically less than 1% audible amplified noise in relation to speech levels at 70mph (5% at 100mph) without earplugs, and ZERO audible amplified noise when using typical earplugs.

Any bike • Any speed • Guaranteed • For use with or without earplugs

Stunning stereo sound • Hearing is believing, so prepare to be amazed!
